DETAILED ACTION

Allowable Subject Matter

1. Claims 19-22 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record is considered to teach, suggest or render obvious the invention of claim 19.

The claimed product-by-process is structurally different and patentably distinct from the prior art rejections of record presented in the previous office action and remaining prior art of record in that the structure defined in claim 19 requires a tab arrangement whereby the tabs during this process must be longer than the prior art tabs of record to permit gathering the current collector tabs into a stack at a location offset from the cell body and outside an area defined by the upper surface and lower surfaces of the cell body (see Fig. 6C).

The prior art of record fail to teach or suggest to any degree of collector tabs that are long enough to read on the product-by-process of claim 19. In each of the prior art rejections of record the collector tabs are gathered into a stack at a location offset from the cell body but within an area defined by the upper and lower surfaces of the cell body. The lengths of these collectors are too short to provide gathering of the collector tabs outside the area defined by the upper and lower surfaces of the cell body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregg Cantelmo whose telephone number is (571) 272-1283.
